Reasons for Allowance

7. The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fail to teach, in combination with the other claimed limitations, specifically claims 1, 12, 15, 26 and 29 are directed to a method for analyzing/optimizing an object oriented program that supports dynamic class loading, the program comprising a plurality of objects, each object belonging to at least one class, the method comprising the steps of: identifying a set A of classes in the program, wherein each of the classes within the set A is capable of, during execution of the program, causing loading of a class outside of the set A; identifying a first set of method calls belonging to the classes in the set A that, during execution of the program, are capable of calling only methods belonging to a class within the set A; identifying a second set of method calls belonging to the classes in the set A that, during execution of the program, are capable of calling methods belonging to a class outside the set A; and storing data that identifies the first and the second set of method calls for subsequent use.

Therefore, the claimed invention improves the optimization process in object oriented programming and dynamic class loading process is more manageable during the execution of the program.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
